

1. The structure of fuels and other primary energy carriers used to produce electrical energy sold by the Seller in 2010.

| No. | Energy source  | Share [%] |
|-----|--|-----------|
| 1.  | Renewable energy sources   | 9.21 %    |
|     | Biomass  | 9.21 %    |
|     | Geothermal energy  | 0.00 %    |
|     | Wind energy  | 0.00 %    |
|     | Solar energy   | 0.00 %    |
|     | Hydroenergy  | 0.00 %    |
| 2.  | Black coal   | 74.42 %   |
| 3.  | Lignite  | 0.00 %    |
| 4.  | Natural gas  | 7.40 %    |
| 5.  | Nuclear energy   | 0.00 %    |
| 6.  | Others (including purchases from Balancing Market and stock exchanges) | 8.97 %    |
|     |  | 100.00 %  |

2. Pie chart presenting the structure of fuels and other primary energy carriers used to produce electrical energy as described in Point 1.

3. Places providing information about the effect of electrical energy production on the natural environment as far as the scale of emissions for fuels and other primary energy carriers used to produce electrical energy sold by the Seller in 2010 is concerned:

| No. | Places providing information about the effect of electrical energy production on the natural environment | Type of fuel | CO2      | SO2    | NOx    | Dusts  | Radioactive waste |
|-----|--|--------------|----------|--------|--------|--------|-------------------|
|     |  |              | [Mg/MWh] |        |        |        |                   |
| 1.  | Everen, Strategic Analysis Department  | average      | 0.7494   | 0.0022 | 0.0015 | 0.0001 | –                 |
